WORKPLACE PURE

RETHINK PRODUCTIVITY WITH SMART BUSINESS SERVICES

Giving Shape to Ideas

THE PERFECT MATCH FOR YOUR BUSINESS NEEDS

Nobody likes dealing with paperwork, but it can feel like an unavoidable aspect of office life. Scanning endless sheets of documentation, retyping printed files, translating documents, converting files from one format to another - these are some of the most repetitive and time-consuming daily tasks.

Now you can simplify all these everyday activities with Konica Minolta Workplace Pure. A highly secure cloud-based platform, Workplace Pure offers a wide range of smart services that make working life easier. So you and your employees will no longer be distracted from the bigger picture.

Just as you use a variety of apps on your smartphone to meet your needs, Workplace Pure lets you access a range of services on the devices you use at work. Take your pick from an ever-evolving range of services that simplify the everyday and help everyone be more productive. Managing users and services is straightforward, and users have easy access to their allocated services wherever they are, on smartphones, tablets, laptops, desktops and bizhub multifunctional printers (MFPs).

Workplace Pure is the change you need to rethink the way you handle routine tasks and help everyone get more done every day. And as a pure cloud platform, it integrates perfectly with your cloud-first strategy and supports your digital transformation agenda.

SMARTER, MORE EFFICIENT BUSINESS PROCESSES

Need to speed up admin tasks?

If you want to focus on your core business instead of spending time on document admin and workflows, then Workplace Pure is right for you. You get free access to a cloud-based platform that supports your document management processes and enhances transparency.

Want to pay only for what you use?

You don't have to worry about investing in new IT hardware or software: access to Workplace Pure is free, and you pay only for the services you use. As soon as you register on the platform, you can start using free trials of services to check they meet your needs and expectations.

Concerned about security?

High levels of security, data encryption and pseudonymisation of personal user data form the basis of the Workplace Pure platform, which is hosted in a German data centre that's certified to ISO 27001. You can rest assured that your Workplace Pure ecosystem is automatically updated and always complies with the latest security standards.

Want to avoid complex user and access management?

Managing users and access is straightforward. Simply connect Workplace Pure to your existing Cloud Identity Provider (IdP) to streamline user management and authentication. You can integrate your user directory from Google Workspace, Microsoft Azure, Okta, Auth0 or Ping Identity. So you don't have to manage users separately; or spend time administering software licences and performing updates and maintenance. It's simple for users, too, who simply log in to their Workplace Pure services with their existing IdP accounts.

"The implementation itself was remarkably simple. As a cloud-based platform, there was no need to install software onto devices or within the existing IT infrastructure."

M. Ángeles de Pedro
Corporate Development at Global Omnium

WORKPLACE PURE: SIMPLIFY YOUR EVERYDAY

The Workplace Pure service portfolio is constantly being updated and expanded. Here are just some of the productivity-boosting services already available to simplify your everyday.

Convert

Do you often find you have digital documents — like Excel charts or multi-page documents — that you need to edit or work with electronically? With Convert, it's quick and easy to create an editable Word or Excel file, or a searchable PDF/A file, from any digital document and you can convert a non-editable PDF into an editable one.

Translate

Do you dream of being able to translate a document from another language simply by pressing a button? Translate is an AI-powered machine translation service that lets you instantly translate simple as well as complex or extensive documents. The translation is delivered as an editable document, with the original page layout (including tables, graphics, images and so on) retained as far as possible. It's fast, reliable and accurate.

Cloud Print

Would you like to simplify your print environment without compromising on security? Cloud Print gives you ultimate flexibility through location-independent secure printing from various applications, with fast and easy deployment.

Choose from a range of cloud print options to suit your business needs. Print directly from an application (like Microsoft Word), via a browser on your smartphone or tablet, or from your Google environment or via Microsoft Universal Print. Print jobs are sent to Workplace Pure for users to release at a bizhub MFP using secure follow-me authentication.

Secure Guest Print

Even if you've already optimised the security of your print infrastructure, letting visitors print their documents may still be a challenge. Secure Guest Print makes it easy for visitors to print from their mobile devices in a secure way. They just send their document to a pre-defined email address, and receive a PIN code that lets them release the printout at an MFP. Perfect for hotels, libraries, the educational sector and more, Secure Guest Print can help any business stay secure while giving guests and visitors the print capability they need.

Smart Scan and Smart Copy

These services make it easy to scan and copy documents in your Workplace Pure environment. They're the perfect complement to Cloud Print, allowing you to set up an all-in-one environment via Workplace Pure on your bizhub MFP.

Fax

Ready to get rid of the hardware and operating costs and inflexibility of your conventional fax solution? The cloud fax service provides a web front-end for faxing on any device, including bizhub MFPs. You can choose to receive incoming faxes by email, or to print them via follow-me or direct print. For outgoing faxes, you have easy access to your personal or global address book. Central archiving provides full transparency of your fax history. Make faxing smart, simple and flexible.

EasyFlow

EasyFlow is a simple way to transform manual and paper-based approval processes — such as invoices, contracts and holiday requests — into efficient digital workflows that allow you to speed up approval cycles, avoid the risk of documents going astray, and make it easier for dispersed teams to get things done.

Workplace Pure* is verified by Google as a Chrome Enterprise Recommended partner.

Konica Minolta bizhub Evolution*
Outstanding Cloud Document-Services Platform

* Workplace Pure used to be called bizhub Evolution.

Scan to External Cloud Storage

Would you like to streamline scanning of documents to cloud storage services like OneDrive™, Dropbox™, SharePoint Online™ or GoogleDrive™? It's easy, when you connect Workplace Pure directly to your external cloud storage services. You can scan paper documents on a networked bizhub MFP, or upload files via your desktop and save them in the external cloud storage. You can even combine this service with other Workplace Pure services, like Translate; and print documents directly from your cloud storage services.

Markomi

Running professional cross-media marketing campaigns traditionally takes time and requires specialist IT and marketing knowledge. Now anyone can do it, with Markomi. In just a few steps, Markomi helps you create, deploy and manage campaigns. Making effective communications with your customers almost effortless.

Announcements

In any organisation, distributing information can be a challenge. Solve it, with the integrated Announcements function. It lets you send messages to bizhub MFPs, where they will pop up on the screen for everyone to see.

HOW TO GET STARTED WITH WORKPLACE PURE

Working with Workplace Pure is as easy as 1-2-3. After internal authorisation through an administrator, users can have access to a broad range of services via web browser from any device.
